

# INSTAGRAM PROFILE AUDIT SUMMARY

Instagram Profile Summary – @life\_with\_janvi

## Profile Overview

- Username: life\_with\_janvi
- Category: Lifestyle / Real Thoughts / Cafe Content
- Current positioning: General lifestyle + aesthetic + thoughts
- Goal positioning: **POV Lifestyle + Café Discovery Creator**

## Core Account Metrics

- Followers: 829
- Total uploads: 118
- Engagement rate: ~20.79% (inflated due to low base + viral spikes)
- Avg likes: **~1.68K (inflated due to few viral café posts)**
- Avg comments: ~13

**Insight:** Engagement Strong potential; but no stable baseline

**Posting Frequency:** 0.5 posts/week = ~2 posts/month

**Insight:** **Biggest growth blocker = extremely low posting frequency**

## CURRENT CONTENT PERFORMANCE INSIGHTS:

### CONTENT & GRID ANALYSIS

- Strong aesthetic consistency (coffee, minimal, calm tones)
- Content is visually appealing but lacks clear niche signalling
- Grid does not communicate a strong creator identity

#### 1. Top Performing Content Insight:

- Aesthetic reels → highest reach
- Café + travel → aspirational engagement

POV thoughts → deeper connection

**spikes: Top posts: 7.7K, 6.7K, 5.3K likes**

**Regular posts: 50–80 likes range**

**Massive spikes on select posts. Indicates Content has virality potential but lacks consistency**

### Critical Observation (MOST IMPORTANT) - What's happening:

Faceless content → high reach; **Face content → low traction**

Pattern: **Faceless cafe / aesthetic content performs best** cause audience **currently follows for aesthetic, vibe, places NOT for personality (yet)**

2. **Current Hashtag Analysis:** #explorepage, #trending, #viralreels, #reelitfeelit

**Insight:** Too generic, No niche targeting, No location/cafe discovery SEO

3. **Caption & CTA Insights:**

- Top words **Rajkot, places, Feels, Sunset**
  - **Insight:** Some location signals exist, but geo-targeting limits mass reach
  - But no storytelling hooks, no POV structure, no engagement triggers
- No strong CTAs → adds to lower engagement depth

4. **Audience Interest:** Audience is aligned with cafes, places, lifestyle visuals →

Strong fit for **POV storytelling + café discovery niche**

---

## KEY INSIGHTS

1. **You already have VIRAL potential** with few posts hitting 5K–7K likes. This means **CONTENT CAN SCALE — BUT SYSTEM IS MISSING**

2. **Biggest gap = inconsistency:** At 2 posts/month the **algorithm cannot learn your content, audience cannot build habit**

3. **Identity confusion:** Currently, lifestyle, thoughts, café... **BUT NO DOMINANT IDENTITY**

4. **Face vs faceless gap:** You don't need to remove face content ---- > **YOU NEED TO BRIDGE INTO IT GRADUALLY**

5. **Inconsistent visual quality and no repeatable format system**

6. **Weak SEO (generic hashtags + non-searchable captions)**

---

## ACTIONABLE RECOMMENDATIONS

### **1. Fix Content Positioning & Bio**

New positioning Example: **Café Discovery + POV Lifestyle Creator**

**New Bio Example:**

Lifestyle, but make it real

Finding cafés and feelings you can't explain 🍷

POV stories + real thoughts

Rajkot-based

See what I discovered ↓ 🗨️

## 2. Content Pillars + Loop-able & Series Based Content Formats FTW

| PILLARS                                 | Priority  | Why? Cause it serves as                  | EXAMPLES                                                                                                                                                                                                                                         |
|-----------------------------------------|-----------|------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. Café discovery / Place Content (40%) | Primary   | Growth engine                            | <ul style="list-style-type: none"><li>• Cafe reels</li><li>• Aesthetic shots</li><li>• Reviews</li><li>• Hidden Gems / New Spots</li></ul>                                                                                                       |
| 2. POV + Real Thoughts (30%)            | Secondary | POV = connection layer                   | <ul style="list-style-type: none"><li>• “POV: sitting alone in a cafe”</li><li>• “Real thoughts nobody says”</li><li>• Relatable inner monologues</li><li>• “POV: healing in quiet places”</li></ul>                                             |
| 3. Aesthetic Loops (20%)                | Support   | Retention + rewatchability driver        | <ul style="list-style-type: none"><li>• Coffee pour loops</li><li>• Walking into café shots</li><li>• Table setup/food placement</li><li>• Slow movement clips (turning pages, stirring coffee)</li><li>• Seamless start = end visuals</li></ul> |
| 4. Face-led Soft Content (10%)          | Gradual   | Builds familiarity + personal connection | <ul style="list-style-type: none"><li>• Slow integration</li><li>• Subtle presence</li><li>• Not direct talking</li></ul>                                                                                                                        |

- A. Aesthetic content is already your strongest growth driver. Gap is that it’s currently random, not systemized or repeatable.

### What to refine:

- Keep aesthetic as a core content pillar (don’t reduce it)
- Layer it with light storytelling (POV hooks, text overlays, caption context)
- Convert it into repeatable formats instead of one-off posts

- B. **Aesthetic + loopable content = highest retention + rewatchability + reach** should be a core execution strategy

### What to implement:

- Design reels where **start = end** (seamless loop)
- Use **continuous motion** (coffee pour, walking, sitting, turning pages)
- Build for **rewatchability**, not just first-view appeal

Every aesthetic reel should aim to feel **endless**, making users watch twice without realizing

- C. **Shift from Formats → Series-Based Content**

Formats are defined, but what’s missing is **continuity**. Series create **familiarity, retention, and follow intent**.

AROHANUM ELEVATE X JANVI – ONBOARDING AUDIT

| What to change:                                                                                                                                                                                                                                              | Why this matters:                                                                                                                                                                                          |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>Clearly structure recurring series like:</p> <ul style="list-style-type: none"> <li>“Cafés you shouldn’t miss in Rajkot – Part 1, 2...”</li> <li>“POV: slow life moments – Part 1, 2...”</li> <li>“Things I don’t say out loud – Part 1, 2...”</li> </ul> | <ul style="list-style-type: none"> <li>Viewers start expecting the next part</li> <li>Increases <b>profile visits + follows</b></li> <li>Makes your content feel <b>intentional, not random</b></li> </ul> |

### 3. REEL FORMAT STRATEGY

Primary growth format = Café Content

| Format 1: Cafe POV                                          | Format 2: Real Thoughts                                    | Format 3: Aesthetic Loop                                                                                        | Format 4: Soft Face Entry                                                                                       |
|-------------------------------------------------------------|------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------|
| <p>Hook:</p> <p>“POV: you found this place by accident”</p> | <p>Hook:</p> <p>“Not everything needs to be shared...”</p> | <ul style="list-style-type: none"> <li>coffee pour</li> <li>walking</li> <li>sitting</li> </ul> <p>Loopable</p> | <ul style="list-style-type: none"> <li>sitting in cafe</li> <li>looking away</li> <li>no direct talk</li> </ul> |

#### Reel Execution (Key Growth Lever)

- Hook → 2 seconds
- Length → 7–12 sec

Loop ending → increases retention

### 4. SEO Led Caption & CTA/CTB Strategy

Captions are key for SEO and discoverability.

**Use exact phrases people search** (like “best cafés in Rajkot or hidden cafés in Udaipur”) so your content shows up in search.

**Better keywords = better reach, targeting, and long-term visibility.**

NOTE: WHILE WE WILL SHARE IDEA WITH CAPTION IT’S NECESSARY TO DETAIL THE CAPTION IN YOUR OWN LANGUAGE, INCLUDING RELEVANT SEO(SEARCH) KEYWORDS RELEVANT TO YOUR POST IDEA TO BUILD RELATABILITY

#### REQUIRED CTA STRATEGY WITH EXAMPLES (YOU CAN TWEAK FURTHER):

|                           |                                                                                                    |
|---------------------------|----------------------------------------------------------------------------------------------------|
| • SAVE → CAFÉ CONTENT     | BOOKMARK THIS HIDDEN CAFÉ FOR YOUR WEEKEND PLANS 📌<br>SAVE THIS FOR YOUR NEXT CAFÉ HOPPING DAY ☕ ✨ |
| • SHARE → POV CONTENT     | THIS IS YOUR SIGN—SEND IT TO YOUR BESTIE<br>TAG / SHARE WITH THE FRIEND WHO OWES YOU A COFFEE      |
| • COMMENT → OPINION-BASED | BE HONEST—WOULD YOU TRY THIS OR SKIP? 🗳️<br>WHICH IS BETTER: COFFEE DATES OR DINNER DATES?         |
| • DM → LOCATION-BASED     | I DON’T GATEKEEP... DM ME FOR EXACT LOCATION<br>WANT THE EXACT ADDRESS? DROP ME A DM               |

## 5. FACE CONTENT FIX (CRITICAL):

Instead of jumping straight into talking-to-camera, ease into face visibility in phases to keep content natural and comfortable.

### Recommended approach:

- **Phase 1 (Week 1–2):** Stay faceless (your current style)
- **Phase 2 (Week 3):** Introduce subtle presence—reflections, back shots, side angles, partial face, expressions
- **Phase 3 (Week 4):** Move to candid face visibility (still natural, no forced talking head)

**Avoid direct monologues for now.**

Start with **walking shots, back shots, reflections**, then gradually bring in **partial expressions**, and finally move to **comfortable, candid face presence**.

## 6. POSTING STRATEGY: Apply below phased approach to posting:

1. **Phase 1:** 3 posts/week (1 cafe reels + 1 POV reel + 1 relatable/thought/gave-led soft content reel)
2. **Phase 2:** scale to 4–5/week (2 cafe reels + 2 POV reels + 1 face-led soft content/alternate with relatable)

## 7. HASHTAG STRATEGY (ONLY 5)

- Use: #rajkotcafes, #cafereelsindia, #lifestylereelsm, #povreels, #explorerajkot
- Rotate: #cafehoppingindia, #indianlifestyleblogger

## 8. ENSURE THAT FOR EVERY:

- **Carousel or static post** – **add alt text** describing the post using Ahrefs (<https://ahrefs.com/writing-tools/img-alt-text-generator>)
- **Reels** – **add location, tag people/brand if applicable, have a good cover photo that aligns with overall profile aesthetic look (mood board correctly)**

## 9. SIMPLE WEEKLY ROUTINE: Every week:

- Continue and consistently post as per the above schedule and content mix
- Minimum 3 stories per day with polls, questions, sliders
- Reply to every comment within 1 hour of posting
- Spend 15 minutes daily commenting on 5 larger creators' posts in your niche

---

## GROWTH PLAN (30 DAYS)

- **Week 1–2:** Focus: faceless + POV & build reach

- **Week 3:** Introduce soft face
- **Week 4:** Increase face visibility

## HOW TO GROW FROM 800 → 3K

- **Step 1: Increase frequency:** From 2/month → 20/month
- **Step 2: Repeat winning format:** Cafe + POV = core
- **Step 3: Improve hooks:** Every reel must stop scroll + create curiosity
- **Step 4: Build identity:** Shift from “random lifestyle” -- > **girl who finds cafes + shares thoughts**

---

### CREATOR REFERENCES (800 → 3K TYPE GROWTH)

#### Creator profile look:

- <https://www.instagram.com/hungry.mj/?g=5>
- [https://www.instagram.com/thatcamerarolldump\\_/?g=5](https://www.instagram.com/thatcamerarolldump_/?g=5)
- [https://www.instagram.com/aayushi\\_a\\_dreamer/](https://www.instagram.com/aayushi_a_dreamer/)

#### Content Reference:

- <https://www.instagram.com/p/DRMaU7lE7wx/>
- <https://www.instagram.com/p/DWtnR2ijPnn/>
- <https://www.instagram.com/p/DRetplNAfFW/>

#### Slow Self/ Face Introduction Beginning with Aesthetic Photo
